Software Developer | Full-stack Developer  
Phoenix, Arizona, United States

## Summary

Passionate Full-Stack Developer

### About Me:

As a seasoned full-stack developer passionate about building scalable, efficient, and user-friendly applications, I've had the privilege of working with innovative companies in Rwanda, driving growth and success through my expertise in Ruby, Go, Docker, and more. With a strong background in computer science and a Bachelor's degree in Software Engineering from the University of Kigali, and continuing in African Leadership University, I've developed a solid foundation in software development, operation management, and team collaboration.

My journey in tech began with a fascination for Ruby and Go, which led me to explore the world of full-stack development. Today, I'm excited to leverage my skills to make a meaningful impact in the tech industry. With experience in both backend and frontend development, I'm well-versed in designing and implementing robust, scalable, and maintainable systems. My goals are simple: to continuously learn, grow, and innovate, while contributing to the success of forward-thinking companies. When I'm not coding, you can find me exploring new technologies, reading about industry trends, or simply enjoying the beauty of Kigali City.

Feel free to connect with me if you're interested in discussing full-stack development, Ruby, Go, Docker, or just want to chat about the latest tech trends!

---

## Experience

### MTN

DevOps Engineer

August 2024 - January 2025 (6 months)

Kigali City, Rwanda

I collaborate with the DevOps Engineering Team.

### Beno Holdings Ltd

Frontend Developer & System Analyst
